### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Brian Brown (202-857-8027) on 14 December 2005.

The application has been amended as follows:

Cancel claim 2.

### **REASONS FOR ALLOWANCE**

2. The following is an examiner's statement of reasons for allowance: The primary reason for the allowance of claim 1 is the inclusion of the limitations being for an inkjet printing apparatus that includes determining means for determining driving conditions including a driving voltage for said air current generating means on the basis of information on the amount of ink to be provided per unit area of a print medium; said determining means determines the driving voltage for said air current generating means in accordance with information on the amount of ink provided to the unit area of said print medium; and said control means drives said air current generating means using the driving voltage determined by said determining means. It is these limitations found in each of the claims, as they are claimed in the combination, that has not been found, taught or suggested by the prior art of record which makes these claims allowable over the prior art.

The primary reason for the allowance of claim 7 is the inclusion of the limitations being for an inkjet printing apparatus that includes determining means for determining driving conditions including at least one of a driving time and a driving voltage for said air current generating means on the basis of information on the amount of ink to be provided per unit area of a print medium; control means for controlling said air current generating means in accordance with the driving conditions determined by said; and wherein the amount of the air currents generated per unit time is changed by changing at least one of said driving time and said driving voltage . It is these limitations found in each of the claims, as they are claimed in the combination, that has not been found, taught or suggested by the prior art of record which makes these claims allowable over the prior art.

The primary reason for the allowance of claim 10 is the inclusion of the method steps being determining means for determining driving conditions including a driving voltage for said air current generating means on the basis of information on the amount of ink to be provided per unit area of a print medium; said determining means determines the driving voltage for said air current generating means in accordance with information on the amount of ink provided to the unit area of said print medium; and said control means drives said air current generating means using the driving voltage determined by said determining means. It is these steps found in each of the claims, as they are claimed in the combination, that has not been found, taught or suggested by the prior art of record which makes these claims allowable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
